

On This Day: A Song For The Winter Solstice

Verse One

On this day
When the northern night is longest
On this day
When our world is full of darkness
On this day
In the quiet of the forest
With the blazing fire before us
We will join the winter chorus
On this day

Verse Two

When we dance
Hand in hand each other holding
When we dance
In the warmth of love unfolding
When we dance
Round the circle we are going
While the fire is brightly glowing
With the hope of life bestowing
When we dance

Verse Three

When we sing
High above us stars are shining
When we sing
Peace on earth now we are finding
When we sing
While our fire is brightly burning
For the light our hearts are yearning
Joyful for the sun's returning
When we sing

Bridge

Let us dance
Let us sing
Let us make our voices ring
All is calm
All is bright
In the stillness of this night
